May 11, 2022

Enhancements to the OSTP Parent Portal

The Oklahoma State Department of Education is excited to announce new changes for the OSTP Parent Portal this year. Several changes have been made to the way accounts are handled for the OSTP Parent Portal, namely that now a single parent account can be associated with more than one student and a single student can be associated with up to 3 parent accounts. This means that all parents will need to create new accounts for the parent portal starting June 14, 2022. The OSTP Parent Portal website is available at https://okparentportal.emetric.net.

Note that the Educator Portal used by districts and schools is not changing. These changes pertain solely to the OSTP Parent Portal used by students' families to access their students' scores.

Enhancements

- A single student may have up to 3 parent accounts associated with him or her. Once the student is associated with 3 parent accounts, no additional parent accounts can be linked to that student.

- A single parent account may have multiple students associated with it. After the parent creates the account with an initial student, the parent may add additional students to the parent account. On June 14, preliminary 2022 data and updated final 2021 data are scheduled to be available in the OSTP Parent Portal.

Next Steps

- As of June 14, all current parent accounts will be deleted.

- ALL parents will need to create new accounts using a valid email address to gain access to the Parent Portal.
